**Retractable
dock shelter**
model ARSR

Armo (UK)

Tel: 01952 606133

email: armouk@armoweb.com

The Armo heavy duty retractable dock shelter.

- Crash resistant frame.
- Reversing aid parking guides.
- Heavy duty material.
- Effective sealing for a wide variety of vehicles.
- Designed for fast easy installation.

Heavy duty retractable dock shelter

model ARSR

Dock seals and shelters

The use of dock seals and shelters is now commonplace – they are used to protect goods and employees from the elements for example or to keep a temperature controlled facility at the correct temperature while the doors are open during the necessary loading and unloading operations. There is the added bonus of reducing energy costs by reducing the loss of expensive warm or cooled air.

Description

Armo's model ARSR retractable dock shelter is the most commonly used because they cater for a mixed vehicle fleet with curtains that extend in from the sides and head allowing a vehicle to push through and keep the worst of the elements at bay. The curtains are designed to flex but maintain contact with the rear of the vehicle to maintain the "seal". Usually retractable dock shelters are circa 3500 x 3500 x 600mm deep and are installed at warehouse floor level. A tolerance of approximately 400mm should be allowed above the tallest vehicle to ensure a long life for the head curtain. Special sizes are available to suit level entry doors or special size vehicles.

The retractable frame is made from galvanised steel to make sure it lasts the course when exposed to the elements. And just in case the shelter gets accidentally hit the arms are designed to retract out of harm's way by moving back and up.

Retractable dock shelters are commonly used on ambient unheated or part heated warehouses where weathering of the opening and protection of the goods are the main criteria.

What type of seal?

Armo makes a complete range of seals and shelters and our engineers are always on hand to offer guidance on technical and commercial matters. Seals and shelters can be categorised into 3 main product groups:

- Retractable dock shelters
- Cushion seals
(See ARCS spec sheet)
- Inflatable seals
(See ARSI spec sheet)

Armo have been manufacturing high quality loading bay and lifting table solutions since 1972, for further technical or pricing information please contact our head office:
