**\*\*FOR SMALL CARPETS & CAR MATS RL 1200 SERIES WRINGER CENTRIFUGES AVAILABLE\*\***

*Carpet and area rug wringer centrifuges come in different inner drum lengths between 2,7 m (8,85 ft) and 4,2 m (13,8 ft) as standard and even up to 5 meters (16,4 ft) versions can be made upon customer request.*

*With rinsing connection on the lid the rug/carpet wringing centrifuge machines rinse the carpets effectively and carpets dry up to 95% just in 2-3 minutes. Centrifuge wringer driers are the most effective, productive solution for large volume carpet and area rug rinse and dry tasks.*

Freshly washed wet carpets are rolled and placed into the carpet wringing centrifuge ( spin dryer) machines,through time adjusted role, in aproximately 2-3 minutes carpet comes out five persent humid. Then it requires to be left for drying for some hours before it is ready for delivering.Colors do not mix. Signs of folding does not occur. Centrifugal Wringer system allows carpets to come out like they are ironed. It runs quiet and smoothly.
